RESEARCH PROFILE

MS Applied Mathematics researcher at NED University specializing in physics-informed neural networks and data-driven PDE solvers. First author of a paper under review at the *Physics of Fluids* (AIP Publishing) proposing an RFF-eikonal joint constraint framework for level-set interface advection. Seeking a fully-funded PhD position to advance scientific machine learning at the intersection of numerical analysis and deep learning.

RESEARCH INTERESTS

Physics-Informed Neural Networks (PINNs) · Neural Operators · Scientific Machine Learning · Data-Driven PDE Modeling · Numerical Analysis · Level-Set Methods for Multiphase Flow

EDUCATION

NED University of Engineering & Technology

Master of Science (MS) in Applied Mathematics

Aug 2024 – Aug 2026

Karachi, Pakistan

- CGPA: **3.36/4.00**
- Thesis: *A Systematic Study of Physics-Informed Neural Networks for the Level-Set Interface Advection*
- Supervisor: Dr. Fahim Raees (Associate Professor; PhD, TU Delft, 2016)
- Coursework:
 - *Core mathematics:* Differential Equations, Linear Algebra, Advanced Discrete Mathematics
 - *Computational methods & optimization:* Numerical Methods and Applications, Scientific Computing, Operations Research and Optimisation
 - *Statistics & machine learning:* Applied Statistics, Statistical Method and Data Analysis, Fuzzy Logic and Neural Networks

International Islamic University Islamabad

Bachelor of Science (BS) in Mathematics

Jan 2017 – Jan 2021

Islamabad, Pakistan

- CGPA: **3.37/4.00**
- **HEC Need-Based Scholarship** (Higher Education Commission, Pakistan): full tuition and stipend for the duration of the BS program.

PUBLICATIONS

[1] **M. Akbar Khan** and F. Raees. *A Systematic Study of Physics-Informed Neural Networks for the Level-Set Interface Advection*. **Physics of Fluids** (AIP Publishing), 2026. Submitted (Manuscript ID POF26-AR-08243, under review). Preprint: [Zenodo](https://zenodo.org/record/14444440).

RESEARCH EXPERIENCE

NED University of Engineering & Technology

Research Assistant — Dept. of Mathematics

March 2026 – Present

Karachi, Pakistan

- Appointed under **Sindh Research Project 321**: mathematical modeling for heat ventilation in rural housing.
- Conducting computational analyses using numerical methods and scientific machine learning under Dr. Fahim Raees.

NED University of Engineering & Technology

Aug 2024 – Present

- Proposed an RFF–eikonal joint constraint framework for PINNs applied to the level-set transport equation; benchmarked on four canonical problems (translation, rotation, reversed vortex, Zalesak slotted disc).
- Achieved **0.63% average relative L^2 error** at $T=8$ on the reversed vortex benchmark — outperforming the PirateNet state-of-the-art of Mullins et al. (*Physics of Fluids*, 2025) (0.85%) using only a standard tanh network.
- Identified eikonal-weight scaling laws separating smooth and severely-deforming interface regimes; correct selection yields an **$82\times L^2$ -error reduction** versus a uniform $w_{\text{eik}}=1.0$ baseline.
- Implemented full PyTorch pipeline (8-layer $\times$ 256-neuron MLP, tanh / RFF input embeddings, two-phase Adam→L-BFGS optimization, causal weighting) with a 58-experiment ablation study on Tesla T4 GPU.
- Reproduced benchmark configurations from the discontinuous Galerkin reference solutions of Raees (TU Delft, 2016) for direct numerical comparison.
- Achieved **0.13% relative L^2 error** on the Zalesak slotted disc benchmark in 15.2 min, outperforming the published state-of-the-art using Random Fourier Feature encoding with residual-based adaptive sampling.

TEACHING EXPERIENCE

Cadet College Ormara

Lecturer of Mathematics & OI/C FBISE Affairs

Aug 2022 – Dec 2025

Gwadar, Pakistan

- Delivered mathematics lectures and tutorials at intermediate and higher-secondary level; designed and assessed examinations.
- Managed all Federal Board of Intermediate & Secondary Education (FBISE) academic affairs: exam registrations, regulatory compliance, and official liaison between the college and FBISE.

Excelsior School System

Mathematics Teacher

May 2021 – May 2022

Islamabad, Pakistan

- Planned and delivered mathematics lessons; designed assessments aligned with the national curriculum.

TECHNICAL SKILLS

Scientific ML	PyTorch, Physics-Informed Neural Networks, Random Fourier Features, L-BFGS / Adam optimization
Programming	Python (NumPy, SciPy, Pandas, Matplotlib, Statsmodels, SQLAlchemy), SQL / PostgreSQL
Numerical Methods	Finite-difference and finite-volume schemes, classical ODE/IVP solvers, spectral methods, numerical linear algebra
Tools	Git, GitHub, VS Code, PyCharm Pro, Jupyter, L ^A T _E X (MiKTeX), TikZ
HPC	GPU training on Tesla T4, PyTorch 2.10, Python 3.12

OPEN-SOURCE PROJECT

PINN Level-Set Solver

[AkbarTheAnalyst/pinn-level-set](https://github.com/AkbarTheAnalyst/pinn-level-set)

PyTorch implementation underlying *Physics of Fluids* submission

- Full PINN pipeline: 8-layer MLP with Tanh activations and Xavier initialization; RFF input embedding; causal weighting.
- Four canonical benchmarks (translation, rotation, reversed vortex, Zalesak disc) with automated ablation infrastructure.

CERTIFICATIONS

- AI for Everyone — DeepLearning.AI (Coursera)
- Google Data Analytics Professional Certificate — Google (Coursera)

LANGUAGES

English — Professional working proficiency · **Urdu** — Native
